

About BMS:

BMS is a dynamic, independent global broker established in 1980, delivering specialist insurance, reinsurance, and capital markets advisory services. Our purpose is to help people, businesses and communities flourish and prosper in a world of risk.

We are a global brand with offices located across the US, Canada, Latin America, Australia, Europe and Asia with both a strong local focus and understanding of market needs. Being independent gives our brokers the freedom to deliver the best solutions and combined with our collaborative team approach, single platform worldwide and renowned personal service, we are the independent broker of choice.

This is an exciting time to join BMS Re as we grow the business across International functions and therefore build out the catastrophe analytics function.

The role will work with the existing analytics teams (predominantly UK and International catastrophe functions as well as US) to support workflow and service broking teams and their clients.

The UK and International teams currently operate as one with a strong focus on collaboration, exploring new ideas and group ownership of both successes and challenges.

The role will focus on catastrophe analytics, utilising industry standard tools (Moody's and Verisk platforms) as well as using and supporting development of bespoke BMS tools and practices to support (re)insurance placements from across multiple lines of business.

There will also be opportunities to get involved in data strategy to drive automation and efficiencies with the aim of moving catastrophe modelling analysts at BMS Re to become consumers of cat analytics, not just producers.

What we're looking for - Functional & Behavioural competencies

- The successful candidate will work across multiple teams and regions. They are expected to be professional and personable at all times; to support and advocate for all aspects of the business and to recognise and build upon areas of development.
- The successful candidate will be quick to learn, comfortable and capable communicating with clients and internal stakeholders, creative in their thinking and problem solving and have keen attention to detail.
- The successful candidate will exhibit strong collaboration skills while also demonstrating the ability to work independently when needed. They will contribute to multiple team projects, offering insights and advice, and actively support colleagues.
- They will personally demonstrate the five BMS values and ensure that team members are aligned with these:
 - Accountable
 - Entrepreneurial
 - Collaborative
 - Empowering
 - Disciplined
